◆ Business Activities

TraxComm Limited, a subsidiary of MTR Corporation Ltd., is the first wholesales-focused fixed network operator in HK. We focus on serving the telecom licensees to operate cost effective & high performance networks.

Our services are fiber-based and provisioned on our own infrastructure, mainly in the highly secured MTR tunnels. We provide a suite of bandwidth services including fiber backbone services, managed bandwidth services (from STM1 to STM16, FE and GE services) and wavelength services. We also provide collocation services that are built in MTR stations.
