CAHK NEWS

CAHK STAR Award bestows industry recognition on companies that have shown their excellence and innovation throughout the year in different streams. Judging is based not on corporate profitability, but on the values of innovation & creativity, functionality, market potential/performance, benefits & impact and quality as symbolized by CAHK STAR Awards.

We have received a large number of entries this year and this has made the contest extremely competitive. The first round assessment has concluded and selected the top three contestant companies from each category to go into the Final Judging.

Who will be the Gold, Silver, and Bronze Winners will be decided at the Final Judging, but the results announcement need to wait until the Award Presentation Ceremony in December.

New telecoms law to take effect

The Telecommunications (Registration of SIM Cards) Regulation is effective on 1 September that to implement the Real-name Registration Programme for Subscriber Identification Module (SIM) Cards in two phases.

The registration programme requires that all SIM cards issued by telecommunications operators of Hong Kong to be used for local communications should have real-name registration within a specified period before activation.

Those operators need to put in place relevant infrastructure and systems for implementing real-name registration within phase one ending 28 February 2022, while the public can continue with the existing use of pre-paid SIM cards and there is no imminent need for real-name registration.

Phase two will begin on 1 March 2022. All newly effective SIM service plan services and new pre-paid SIM cards issued from that date will require real-name registration before activation.

SmarTone and The Kowloon Motor Bus Co. (1933) Ltd join hands to launch the first 5G Bus. During the experience period, passengers can use 5G Wi-Fi services for free in 30-minute sessions. These 5G buses serve ten urban and rural routes.
