

Unlocking the Future with **AI-Ready Data Centres**

The rise of AI is transforming our world, opening doors to smart buildings and cities. But to fully harness AI's potential, we need AI-ready data centres to unlock the potential of tomorrow. Today.

THE VALUE OF THE NEUTRAL HOST MODEL

A cost-effective approach when deployment and costs are shared

Quicker network expansion and connectivity enablement

High quality knowledge and technical expertise

6

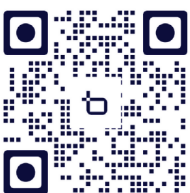

Transport networks connecting billions

4

Smart city projects globally

60+

Private network deployments
