Business Activities

Nokia is a global leader in the technologies that connect people and things. Powered by the pioneering work of Nokia Bell Labs, our research and innovation division, and Nokia Technologies, we are at the forefront of creating and licensing the technologies that are increasingly at the heart of our connected lives.

We combine global leadership in mobile and fixed network infrastructure, with the software, services, and advanced technologies to transform how smart devices and sensors tap the power of connectivity. With state-of-the-art software, hardware and services for any type of network, Nokia is uniquely positioned to help communication service providers, governments, and large enterprises deliver on the promise of 5G, the Cloud and the Internet of Things.

Serving customers in over 100 countries across the world, Nokia is driving the transition to smart, virtual networks and seamless connectivity by creating one, single network for all services, converging mobile and fixed broadband, IP routing and optical networks, with the software and services to manage them seamlessly. Our research scientists and engineers continue to invent and accelerate new technologies that will increasingly transform the way people and things communicate and connect: 5G, ultra broadband access, IP and software define networking, Cloud applications, IoT and security platforms, data analytics, as well as sensors and imaging.
