Larry Tam Managing Director, Hong Kong &
Macau, Brocade

Business Activities

Brocade (NASDAQ: BRCD) networking solutions help the world's leading organizations turn their networks into platforms for business innovation. With solutions spanning public and private data centers to the network edge, Brocade is leading the industry in its transition to the New IP network infrastructures required for today's era of digital business. With the acquisition of Ruckus, Brocade is also leading in the wireless networking areas of Wi-Fi and LTE.

Automation has been a long-standing hallmark of Brocade solutions, starting with storage networking in 1995. In 2009, Brocade extended its automation leadership with the industry's first Ethernet fabric comprising Brocade® VDX switches featuring Brocade VCS® Fabric technology. In 2016, Brocade introduced Brocade Workflow Composer, a server-based platform that provides DevOps-style network automation for provisioning, validation, troubleshooting and remediation of multivendor networks, while integrating with workflows across multiple IT domains for end-to-end automation.

Additional key facts about Brocade:

- The #2 vendor in data center networking market share (Source: IDC)
- Virtual visibility and analytics solutions for advanced insight into service provider networks
- Virtual application delivery controller for scaling, securing, and delivering applications in the cloud or data center
- Virtual Evolved Packet Core (vEPC) solution purpose-built for virtualization and the cloud, including MVNO, M2M, and enterprise mobile services
