Business Activities

Truphone, a global mobile operator for business travellers, expands the reach of businesses beyond the borders of their home country. Newly launched Truphone World mobile plan covers voice, text and data in 66 global destinations including China, Singapore, Japan, UK, US, Australia and Canada. Designed to give peace of mind while travelling abroad and running businesses with overseas customers, roaming charges are now predictable so that businesses can have better control in terms of cost.

Our patented SIM technology enables users to carry 8 international numbers on 1 SIM card to grab every business opportunity around the globe. A number is available in each of the 8 Truphone Zone countries - Hong Kong, UK, US, Australia, Germany, the Netherlands, Poland and Spain. With our Smart Caller ID display technology, contacts in the Zone always see your local number and they can phone you at local rates wherever you are.
