Business Activities

Since our founding in 1999, DYXnet has empowered enterprises to drive business growth with ICT innovations. We are committed to provide solutions for customers through disruptive technologies and services including enterprise network solutions like MPLS and SD-WAN, cloud solutions and data centre services.

We strive to strengthen our dominant position in Hong Kong and the Asia Pacific region. Among the first ICT service providers in the region to have obtained ISO certifications, we are also one of the first official members of the China Cross border Data Telecommunications Industry Alliance and one of the first SD WAN service standard drafting units.

As a wholly-owned subsidiary of VNET Group, a Greater China's leading carrier and cloud-neutral Internet data center services provider, we work towards a common goal of delivering innovative solutions. The group went further by forming a new sub-brand "NEOLINK" in April 2021, which integrated its five product lines including Data Center, Network Products, Hybrid Cloud, Bare Metal and O&M Management Services. As a member of NEOLINK, DYXnet will work together in providing a suite of diverse solutions for customers in achieving full-cycle digital transformation.
