CAHK x Meta-V x HPE Seminar 2022

Accelerating the Data Journey -
Turn Data into Knowledge in a
Safe, Speedy & Smartest way

Organiser:

Co-Organisers:

CAHK x Meta-V x HPE Seminar 2022 on the theme “accelerating the data journey” ended with great success on 28 September, 2022.

The physical seminar has facilitated an open idea exchange between the expert speakers and the audience on how data acceleration improves business results and performances. The discussion has touched on various hot topics for instance network coding, machine learning, AI, NLP, and chatbots.

On behalf of CAHK, Mr. Vincent Kwok, President of the Green ICT Group, has delivered welcome remarks to kick start the fruitful discussion. We would like to express our sincere gratitude for the speakers’ contributions in knowledge and cases sharing. The names below have followed the on-stage order.

Dr. Shakeel Salamat, CTO of CU Coding Limited – specialise in using Network Coding to build a secure platform for efficient information transmission and storage

Mr. Jason Yang, Enterprise Solution Architect of HPE – the global edge-to-cloud company

Mr. Kinni Mew, CEO & Founder of Mindlayer – provides AI-powered customer service solution that leverages NLP engine and trilingual ChatBot Technology
